STATEMENT OF EVIDENCE

S 1/4 cor Sec 27-101-15

This corner was originally established by Deputy Surveyor John Quigley of the U.S. General Land Office in 1853. The government notes show a wood post was set with a mound of earth and trench and handfull of small stones.

1941 Mower County Road Grading Plans show no corner found at this location.

1994 Jones, Haugh & Smith Inc crew under the direction of John H. Schulte IV, RLS 13807, dug with the county backhoe on centerline of CSAH No. 6 and in line with fence north and south. Found spike with flagging below bituminous. Continued digging to old roadbed, then to virgin soil at 4.5 feet more or less. Found no evidence of public land survey corner.

Set cast iron at location of spike found on and in line with fence north, south and on centerline east-west road grade.

The monument fit occupation and road centerlines within the section and is accepted as best evidence of a perpetuation of the original public land survey corner.
