STATEMENT OF EVIDENCE

NE cor Sec 14-101-16

This corner was originally established by Deputy Surveyors Charles Phipps and Edward Fitzpatrick of the U.S. General Land Office in 1854. The government notes show a wood post was set with a mound of earth and trench.

The following were contacted for section corner information:
Mower County Highway Department
Mower County Recorder
Zenk Engineering
Tucker Land Surveying

The following information was obtained to support evidence of the perpetuation of the original public land survey corner.

1889 Clausen, Mower County Surveyor, indicates a government post at this corner which was 40.34 chains north of the W 1/4 corner of Section 14-101-16.

1958 Mower County Highway Department Book 1 and County State Aid Highway No. 18 Road Plans indicates a concrete monument in place at this location.

1993 Jones, Haugh & Smith Inc crew under the direction of John H. Schulte IV, RLS 13807, searched area for corner and found no evidence of concrete monument in place noted in County State Aid Highway No. 18 Road Plans. Testimony of a Mower County Highway Department employee notes that road construction in the late 1980's would have destroyed any perpetuation of this corner or the original public land survey corner. Therefore we set this corner using a straight line extending from the S 1/4 corner of Section 11-101-16 through the County Road PI at a distance of eight feet east of County Road PI according to County State Aid Highway No. 18 Road Plans.

The monument set fits occupation lines within the section and is accepted as best evidence of a perpetuation of the original public land survey corner.
