STATEMENT OF EVIDENCE

SW corner Sec 22-101-17

This corner was originally established by Deputy Surveyor Edward Fitzpatrick of the U.S. General Land Office in 1853. The government notes show a wood post was set with a mound of earth and trench.

The following were contacted for section corner information:
Mower County Highway Dept.
Mower County Recorder's Office
Zenk Engineering
Tucker Land Surveying

No information was obtained to support evidence of a perpetuation of the public land survey corner.

1991 Jones, Haugh & Smith crew, under the direction of John H. Schulte IV, dug with County backhoe on centerline of north-south-east roads in line with field division west for Bridge Survey #2551. Dug a 5'x12'x5' deep hole and found no evidence of public land survey corner or a perpetuation thereof. At this location uncovered large GTE telephone cable crossing through intersection which may have destroyed any evidence. Placed cast iron monument on centerline of roads in line with field division west.

The monument set fits occupation lines, fence lines and road centerlines within the section and is accepted as best evidence of a perpetuation of the original public land survey corner.
