STATEMENT OF EVIDENCE

NW corner Section 6-101-17

This corner was originally established by Deputy Surveyor Elisha S. Norris of the U.S. General Land Office in 1854. Government notes show corner was marked with a wood post and charred stake.

November 1987 Jones, Haugh & Smith Inc contacted the following for corner information:

Mower County Highway Department

1888 records from Clausen shows a post was found during a private land survey.

No other record of this corner was to be found.

Nov. 1987 Jones, Haugh & Smith Inc crew dug with County backhoe on centerline centerline north-south-east-west roads and uncovered a large bridge spike 0.5 feet deep. Continued digging and at a depth of 3 feet more or less uncovered a 1/2"ø iron cast in a 8" diameter concrete post. Placed a capped 5/8"ø iron over concrete post.

Concrete monument found is typical of corners found throughout Mower County set by G. Everett Carlson and A.C. White, both former Mower County Engineer and Registered Land Surveyor.

The monument found fits occupation and road centerlines within the section and is accepted as a perpetuation of the original public land survey corner.
