DOCUMENT NO. _____

M.H.D. FORM NO. 2105

S1/4 Corner Section 20-T102N-R16W

Deputy Surveyor John Quigley of the U.S. General Land Office originally established this corner in 1853. The government notes show a wood post was set with mound of earth and trench.

The following were contacted for section corner information.

Mower County Highway Department
Mower County Recorder
Tucker Land Surveying

No record of this corner was obtained from the above mentioned offices.

1888 Clausen field notes show a post at the midpoint of straight line between section corners and a measured distance of 5163.84 on south line of section.

2004 JHS crew measured South line of section 20 and found 5172.72 Vs. Clausen 5163.84. The location of the ¼ corner therefore the position was computed at midpoint of a straight line between section corners.

The monument fits occupation and road centerlines within the section and is accepted as best evidence of a perpetuation of the original public land survey corner.
