Statement of Evidence

EAST QUARTER CORNER SECTION 30 TOWNSHIP 103 NORTH RANGE 15 WEST 5TH P.M.

July, 1853 — John Quigley, Deputy Surveyor, set qr. sec. post. Built mound with trench per instructions. Put hand full of small stones in center and planted Osage Orange Seeds in SE Corner during the original Public Land Survey.

April 12, 1989 — Ronald J. Olson, RLS 11009, excavated with a backhoe 6 feet square by 5 feet deep to natural ground centered at the intersection of the roads and found a 12" E-W by 10" N-S by 7" high stone 3.6 feet below the surface and below an old roadbed in gravel fill. The stone was found at the center of the intersection.

An analysis of the record data gives no indication of the origin of the stone. It is similar in size to other stones found at other corners in the area and was found to agree with the lines of occupation. The stone is accepted as marking the location of the original Public Land Survey Corner.
