Statement of Evidence:

North Quarter Corner Section 31, Township 103 North, Range 17 West

1854 In October, William L Anderson US deputy Surveyor surveyed and established all section corners, quarter section, and meander corners.

1974 Mower County ties sheet shows a spike in the top of a corner fence post.

2003 A Jones, Haugh and Smith survey shows an iron stake at this corner.

2009 On October 22, a Bolton & Menk Inc survey crew survey for this corner. No evidence of iron stake or the spike in corner fence post were found.

Using the 2003 Jones, Haugh and Smith Inc survey Bolton & Menk calculated a position beased on other monuments found on the same survey.

2011 On May 19, Bolton & Menk Inc, survey crew found that the calculated position was inside a utility pole of a large overhead transmission line. The calculated position seems reasonable and is accepted as the corner.
