STATEMENT OF EVIDENCE

N 1/4 corner Section 27-104-14

This corner was originally established by Deputy Surveyor John Taylor of the U.S. General Land Survey Office in 1853. The government notes show this corner was marked with a wood post and a trench and a mound of earth.

The following were contacted for section corner information:

Mower County Engineering Department
Mower County Recorder's Office

1990 Jones, Haugh & Smith crew together with the Mower County backhoe dug on centerline of north-south road in line with fence west and uncovered a 5"x8"x12" pointed field stone over a nest of stones 2.5' deep in virgin soil. Placed a 5/8" diameter iron capped 13807 on the south side of a pointed field stone.

Corner found fits occupation and road centerlines within the section and is accepted as best evidence of a perpetuation of the public land survey corner.

For electronic survey data and analysis contact the firm of Jones, Haugh & Smith Inc.
