Statement of Evidence:

North Quarter Corner Section 24, T104N, R15W, 5th P.M.

August 1853 — John Quigley, Deputy Surveyor, set a post in a mound for the corner during the original public Land Survey.

1968 — County highway plans indicate the regraded road placed fill material over the old road at the quarter corner.

October 24, 1989 — Minnesota Department of Transportation excavated an area 9 feet East-West by 4 feet North-South centered on the center of County Road 15 and brush line to South and old fence line to the North. A 10 inch by 12 inch by 18 inches high pointed granite stone was found 3 1/2 feet deep and under an old road surface.

An analysis of the record and survey data indicates that the origin of the pointed stone is not of record. However, the stone does enjoy a harmonic relationship to adjacent corner stones dating from the 1930's and to lines of occupation. The stone is accepted as marking the public Land Survey Corner.

For details of the electronic survey, contact the Minnesota Department of Transportation's Surveys Section of the Rochester District Office.
