STATEMENT OF EVIDENCE

E 1/4 corner Section 7-104-17

This corner was originally established by Deputy Surveyor John Fitzpatrick of the U.S. General Land Survey Office in 1853. The government notes show this corner was marked with a wood post and a trench with a mound of earth.

The following were contacted for section corner information:

Mower County Engineering Department
Mower County Recorder's Office

1990 Jones, Haugh & Smith crew together with the Mower County backhoe dug on centerline of north-south road in line with fence west and uncovered 3 1/2" diameter wood post on the east side of a 6"x6"x14" pointed field stone 4.0 feet below road surface in virgin soil. Placed a 5/8" diameter iron in wood post and over post on road surface.

Corner found fits occupation and road centerlines and is in agreement with 1853 records of John Fitzpatrick and is accepted as best evidence of a perpetuation of the public land survey corner.

For electronic survey data and analysis contact the firm of Jones, Haugh & Smith Inc.
