STATEMENT OF EVIDENCE

N 1/4 corner Sec 9-104-18

This corner was originally established by Deputy Surveyor William I. Anderson of the U.S. General Land Office in 1854. The government notes show the corner was marked with a wood post and the following bearing trees were marked:

| | | | |
|---|---|---|---|
| 12" Burr Oak | N 15° W | 82 links | = 54.12 ft |
| 6" Burr Oak | S 64° W | 15 links | = 9.90 ft |

In 1986 Jones, Haugh & Smith Inc contacted the following for section corner information:

Mower County Highway Dept.
Tucker Land Surveying

No information or surveys in the area were found to have been done.

In September 1986 Jones, Haugh & Smith Inc crew traversed around the section and found a 6" diameter wood corner fence post in a 3-way fence intersection. After computing a section breakdown, we accepted the position of corner fence post as best evidence of the public land survey corner.

The position fits occupation and fence lines within the section and is accepted as best evidence of a perpetuation of the original public land survey corner.

For electronic survey data and analysis, contact the firm of Jones, Haugh & Smith.
