Statement of Evidence

EAST QUARTER CORNER SECTION 27, TOWNSHIP 104 NORTH, RANGE 18 WEST, 5TH P.M.

Aug., 1854	William Anderson, Deputy Surveyor, set a post at the corner during the original Public Land Survey.
June, 1885	Government post shown in Clausen Field notes, and used to subdivide Section 26.
1936±	County Engineers Road Plans shows section line at Station 132+10
1962	County Engineers Road Plans show a concrete Monument inplace. The centerline is shown as 12 feet West of the section line.
July 1990	Zenk Read Trygstad & Associates excavated 7 feet deep by from 12 feet to 22 feet East of Centerline by 12 feet long North to South. A stone .6 feet by .8 feet by 1.8 feet high was found 2.3 feet below the surface. A concrete monument and a nail were found above the stone.

An analysis of the record data gives no indication of the origin of the stone. Other stones of similar size have been located at corners throughout Mower Country. The stone agrees with the County Road centerline and the township road West. It is accepted as marking the location of the original Public Land Survey Corner.
